

CLAIMS

What is claimed is:

1. A gutter section comprising:
a molded gutter section comprising a liquid passage and an air flow passage adjacent thereto.
2. The gutter section as recited in claim 1, wherein said air flow passage is located below the liquid passage.
3. The gutter section as recited in claim 1, wherein said air flow passage comprises a multiple of air flow passages.
4. The gutter section as recited in claim 1, wherein said air flow passage comprises a multiple of air flow passages.
5. The gutter section as recited in claim 1, wherein said air flow passage comprises a multiple of non-linear air flow passages.
6. The gutter section as recited in claim 1, wherein said air flow passage comprises a multiple of linear air flow passages.

7. A gutter thawing system section comprising:
 - a first molded gutter section comprising a liquid passage and a first multiple of linear air flow passage adjacent thereto;
 - a second molded gutter section comprising a second multiple of non-linear air flow passages which connect at least two of said first multiple of linear air flow passages; and
 - a third molded gutter section comprising an input connector and a return connector, said input connector in communication with at least one of said first multiple of linear air flow passages, and a said return connector in communication with at least one of said first multiple of linear air flow passages.
8. The gutter section as recited in claim 7, further comprising a hot air supply in communication with said input connector and a return connector.
9. The gutter section as recited in claim 8, further comprising a manifold in communication with said hot air supply and said input connector and a return connector.
10. The gutter section as recited in claim 9, further comprising a fan to raise a pressure of an airflow from said hot air supply to said manifold to above atmosphere.
